Managers Report 3/29/2010

Most of the road signs are in place. We are missing four signs and the Thor Drive signs needs moved to the other side of the road.

Most of the lake buoys are in the lake with the names on them. But before we got done with the work boat it developed a hole in one of the floats because of oxidization. We repaired it and we will see on Monday how well it holds up to the pressure.

Maintenance has been cold patching roads and doing rock repairs where it is needed the most.

We have spoken to Mary the Postmaster in Eaton and she said we can use our current mailing permit to mail the trash Invoices using first class postage rates.

Also, we have found two software programs, TerraTrash and Waste books written by Quick books. To manage the trash billing, Tammv is also looking at our current software to see if we can use it for billing instead of purchasing new software, TeiraTrash cost \$1996 and Waste books is \$895 for one user. A decision will be made by the next Board meeting and we will let YOU know what option will work best.
